SUMMER CAMP

3-4 years

JULY 14 TO 17

... Let's go on an adventure!

Organization and clarifications

The Kids-Trip camps take place during the day from 8 a.m. to 5 p.m. (depending on road traffic or intensive fun...)

Children are transported by bus by careful animators who are attentive to each of your children.

We always take into account the feeling of the group to offer the children a maximum of well-being and fun.

In case of bad weather, there are many backup solutions,

We will opt for indoor activities and parents will be notified the next day.

Lunches and snacks are provided. If you wish, you can pack a small snack as well

This year the children's camp will take place in collaboration with
the Curved Carrot collective

and Charlotte who will welcome us every day in her small eco-responsible farm.

DISCOVER THE ALL-ENCHANTING PROGRAM

... Let's go on an adventure!

Monday: discovering WORMY

Discovery of Wormy, our glass of earth with a thousand stories that knows so well nature and brings us its messages every day.

He will tell us a story about summer that will guide us directly into our huge garden with its thousand smells, colors, flavors and textures.

Children will be able to discover the main plants that are growing here at the moment. We will continue to the bottom of the field, where the ponds are, which will lead us to talk about the water.

We will discover the art of contemplation during a suspended moment. We will pick aromatic plants from the garden to make a good homemade herbal tea. And the children will be able to make their bouquets for the house!

The afternoon will be dedicated to the discovery of the chickens. We'll start by learning about their lives, what they eat, and how they function, and then we'll talk about one of their biggest predators: the fox. Children will be able to make an origami fox craft to take home.

... Let's go on an adventure!

Tuesday: what is a garden?

Wormy will explain to us what we do in a garden, he will talk to us about the cycle of a plant.

Children will be able to carry out activities in the garden and even sow seeds or plant a seedling to take home in a pot that they will decorate.

What about the pebbles in the garden? We don't want it!

Kids will help remove some and can decorate them for the house because pebbles can be great but elsewhere than in the garden!

In the second part of the day, we will talk about maize in all its forms.

How does it crash? What does it look like? And how is popcorn actually made? Children will be able to make popcorn from the farm's corn!

Le Collectif des Carottes Courbes

... Let's go on an adventure!

Wednesday: let's take a walk in...

Wormy will talk to us about wild nature, the kind that we don't disturb and the forest in particular.

**We will take a morning walk to the waterfall trail
(1 hour of discovery, including a quarter of an hour on a small forest path that is sometimes muddy).**

In the afternoon, the children will be able to make some harvests for the house.

**We will accompany them in their questions and teach them
the art of harvesting, never take everything!**

Le Collectif des Carottes Courbes

... Let's go on an adventure!

Thursday: we cook, we harvest!

Wormy will tell us about all the good recipes we can made with freshly picked ingredients.

We will harvest fruit from the farm to cook it.

Children will carry out a nature treasure hunt in a spirit of collaboration.

The afternoon will be devoted to the creation of a herbarium with Plants that are already dry but that actually exist in the garden.

Le Collectif des Carottes Courbes

... Let's go on an adventure!

Friday: Hands-on!

**This time we make our own dinner:
We will make our bread, our grills and our garden salad.**

All over a wood fire!

The afternoon will be dedicated to movement games to end the camp with fun!
